9:00 A.M. or 1 P.M EST

**Multijurisdictional Counterdrug Task Force Training Announces:
Tactical Medical Course (TacMed) – Distance Learning
January 3 and 4, 2018**

Restricted to LEO and MIL

What is MCTFT? MCTFT is a 125-acre facility that provides tuition-free training to military, law enforcement and community-based organizations. MCTFT's tactical instructional staff is drawn from across both the military and law enforcement tactical / special operations communities with decades of real-world and instructional experience. The unique nature of MCTFT has provided leading edge operational skills development for students from agencies at every level of government. This course will do the same for you. Explore more: www.MCTFT.org

Date, time and location: January 3 and 4, 2018 | 9 a.m. or 1 p.m. EST (each class is 1.5 hours in duration) | Your live instructor will meet you online at: www.MCTFT.Blackboard.com

Points of Contact: For IT/registration issues please contact Specialist Collazo at 904-682-3912 or registrar@MCTFT.org. Major Kicklighter 904-682-2443 (office) or 904-352-6266 (mobile).

Cost: The tuition is free.

Registration: Visit: <https://mctft.geniussis.com/Registration.aspx> Once there, find your specific course, click add, then go to the top of the page and click register. You will receive a confirmation email later. Browsers other than Internet Explorer are best. There are two course times offered on two different days, for a total of four available course slots, choose the one that best suits your schedule. Use only official names and official agency email addresses.

Equipment requirements (provided by each student): Paper, pen, computer with multiple browsers and working speakers to hear your live instructor.

Description: As a law enforcement officer or member of the military there is a chance that you will find yourself on a scene where someone is severely wounded. If your life is still in danger from an active shooter or some other threat and medics are unavailable it will be up to you to react. Tactical Combat Casualty Care or TCCC was developed to assist military personnel in dealing with this type of situation. This course has been designed to help law enforcement officers and military personnel benefit from medical knowledge gained in combat and incorporate it into their own tactics, techniques, and procedures while their duties.

Objectives: Be able to identify, prioritize, and treat life threatening injuries, understand what should be included in a first aid kit, control bleeding, open an airway, treat chest wounds, treat for shock and much more.

Restricted to LEO and MIL
